SUMMARY

Industrial Engineering student with a strong interest in Artificial Intelligence, Machine Learning, and Data Analytics. Experienced in Python programming, data analysis, and AI development through national training programs and project-based learning. Proven ability to work in collaborative environments, conduct data-driven analysis, and contribute to research activities. Passionate about leveraging AI solutions and data insights to solve real-world problems.

EDUCATION

Universitas Pattimura

Bachelor of Industrial Engineering, GPA: 3.50/4.00, Relevant Interests: Artificial Intelligence, Machine Learning, Data Analytics, Data Science

2023 - Present

EXPERIENCE

Student Research Collaborator

2026 – Present

Universitas Pattimura

- Assist lecturers in research activities including data collection, processing, and analysis.
- Support research documentation and report preparation.
- Participate in survey preparation and field data collection activities.
- Collaborate with research teams in organizing and managing research datasets.

PROJECTS

HealMate AI – AI-Powered Emotional Recovery Platform | DBS Foundation Coding Camp Capstone Project | 2026

- Collaborated with a multidisciplinary team to develop an AI-powered platform that supports emotional recovery after heartbreak.
- Contributed to project planning, feature development, testing, and documentation.
- Participated in designing AI-based solutions focused on user well-being and engagement.
- Utilized GitHub for collaboration, version control, and project management.
- Presented project outcomes and recommendations to mentors and evaluators.
- Technologies: Python, Machine Learning, GitHub, AI Tools

YouTube Comment Sentiment Analysis | Personal NLP Project | 2026

- Collected and processed YouTube comments through data scraping techniques.
- Applied Natural Language Processing (NLP) methods for text preprocessing and sentiment analysis.
- Performed data cleaning, feature extraction, and analytical interpretation.
- Generated insights from user opinions and engagement patterns.
- Technologies: Python, NLP, Pandas, Scikit-learn

Data Analysis Project | Asah Program by Dicoding | 2025

- Conducted data cleaning and preprocessing.
- Performed exploratory data analysis (EDA) to identify trends and patterns.
- Created visualizations and generated insights from datasets.
- Applied analytical methods to support data-driven decision making.
- Technologies: Python, Pandas, NumPy, Matplotlib

TECHNICAL SKILLS

Programming: Python

Machine Learning & AI: Machine Learning Fundamentals, Natural Language Processing (NLP), Model Evaluation

Data Analytics: Data Cleaning, Data Processing, Exploratory Data Analysis (EDA), Data Visualization

Tools: GitHub, Google Colab, Jupyter Notebook, Microsoft Excel

Soft Skills: Problem Solving, Teamwork, Communication, Critical Thinking, Research, Time Management

CERTIFICATIONS

Asah Program by Dicoding – Machine Learning Cohort (2025–2026)

Kominfo – Data Analyst Training (2024)

Kominfo – Python Programming Training (2023)

Membangun Proyek Deep Learning Tingkat Mahir – Dicoding (2026)

Belajar Fundamental Deep Learning – Dicoding (2026)

Membangun Sistem Machine Learning – Dicoding (2025)

Bootcamp Data Analytics – Digital Talent Scholarship (2023)

English for Career Development (Coursera) – University of Pennsylvania (2023)
